

Scott Cullen, MD

[Role]

Principal

Dr. Cullen has extensive experience in strategy, clinical and operational process design, and technology integration, as well as the implementation of physician networks. He has 23 years' experience in clinical delivery, management, and consulting, and has led work at some of the nation's top AMCs and integrated delivery networks.

Dr. Cullen has led the development of strategy for population health transformation and value-based care for more than a dozen organizations. His experience in clinical analytics and change management helped him lead the development of more than 20 clinically integrated networks and ACOs from conception through activation. Prior to joining ECG, Dr. Cullen was the president of Advisory Services for Valence Health, where he built a \$10 million business unit in three years and won a Best in KLAS award.

Dr. Cullen's focus at ECG is aimed at facilitating transformation. He has helped numerous systems navigate the challenges of emerging payment and delivery models to manage populations successfully while maintaining viability.
